## **Surgery Drop Off Instructions**

Your pet is scheduled for surgery at Deerfield Veterinary Clinic. He/she will need to be dropped off between 7am – 8am. Please do not give any food after 10:00 pm the night before. You may offer water until you leave home, but please make sure your pet uses “the restroom” before you drop off unless otherwise instructed.

We recommend pre-surgery blood tests for all our patients. This testing ensures that your pet can properly process and eliminate an anesthetic. While optional for young healthy pets, senior pets (over 6-8 years old) must be tested due to their higher anesthetic risks. This testing can be done the morning of the surgery if it has not been done within a month prior to the procedure.

If your pet is not micro chipped, the HomeAgain Microchip can be implanted during surgery for the price of \$50.00 (which includes registration). Microchipping greatly increases the chance of finding your pet should he/she ever be lost. Please let us know if you would like your pet to be micro chipped while here for surgery.

We also offer additional pain management post surgery. You will be able to choose this on the day of surgery. It is highly recommended for all patients.

If you are unable to keep this surgery appointment, we request a three day notice.

Thank you and we look forward to seeing you!
